Positive Outcomes and Benefits for Young Girls

Positive Representation

Increase STEM vocabulary

Pretend Play in STEM careers

Encourage Critical Thinking and Creativity

Success Stories and Testimonials

As a professor who focuses on early science, math and engineering in the early childhood classroom, I can state without hesitation, that the Surprise Powerz Stem Dolls are a wonderful addition to the STEM toys-for-kids market. The focus on empowering young girls to engage in science activities and careers is laudable.

- Kathleen Sheridan PhD

We had been looking for ways to introduce coding to our 4 year old and Codie the Coder was the perfect way to introduce the topic! Its also a plus that she looks like my little! We love Codie!!

- Olivia B.

Bought Vera the Vet for my daughter. She can not put it down. She is listening to to doll and repeating what she says. Wants to answer the questions. She loves it!

- Kody L.

Proven Research

Surprise Powerz' research-based Character Play STEM Program has been tested in preschool classrooms and is proven to work! Surprise Powerz positively impacts a preschool student's STEM engagement, literacy and creativity!

Increase engagement

Increase literacy

Increase creativity

3 Key Takeaways To Maximize Your Little Girl's STEM Learning Opportunities

01

Make time for quality interaction that supports your child's STEM learning

02

Understand what early STEM learning actually looks like

03

Limit screen time and encourage your child to engage in STEM activities at home

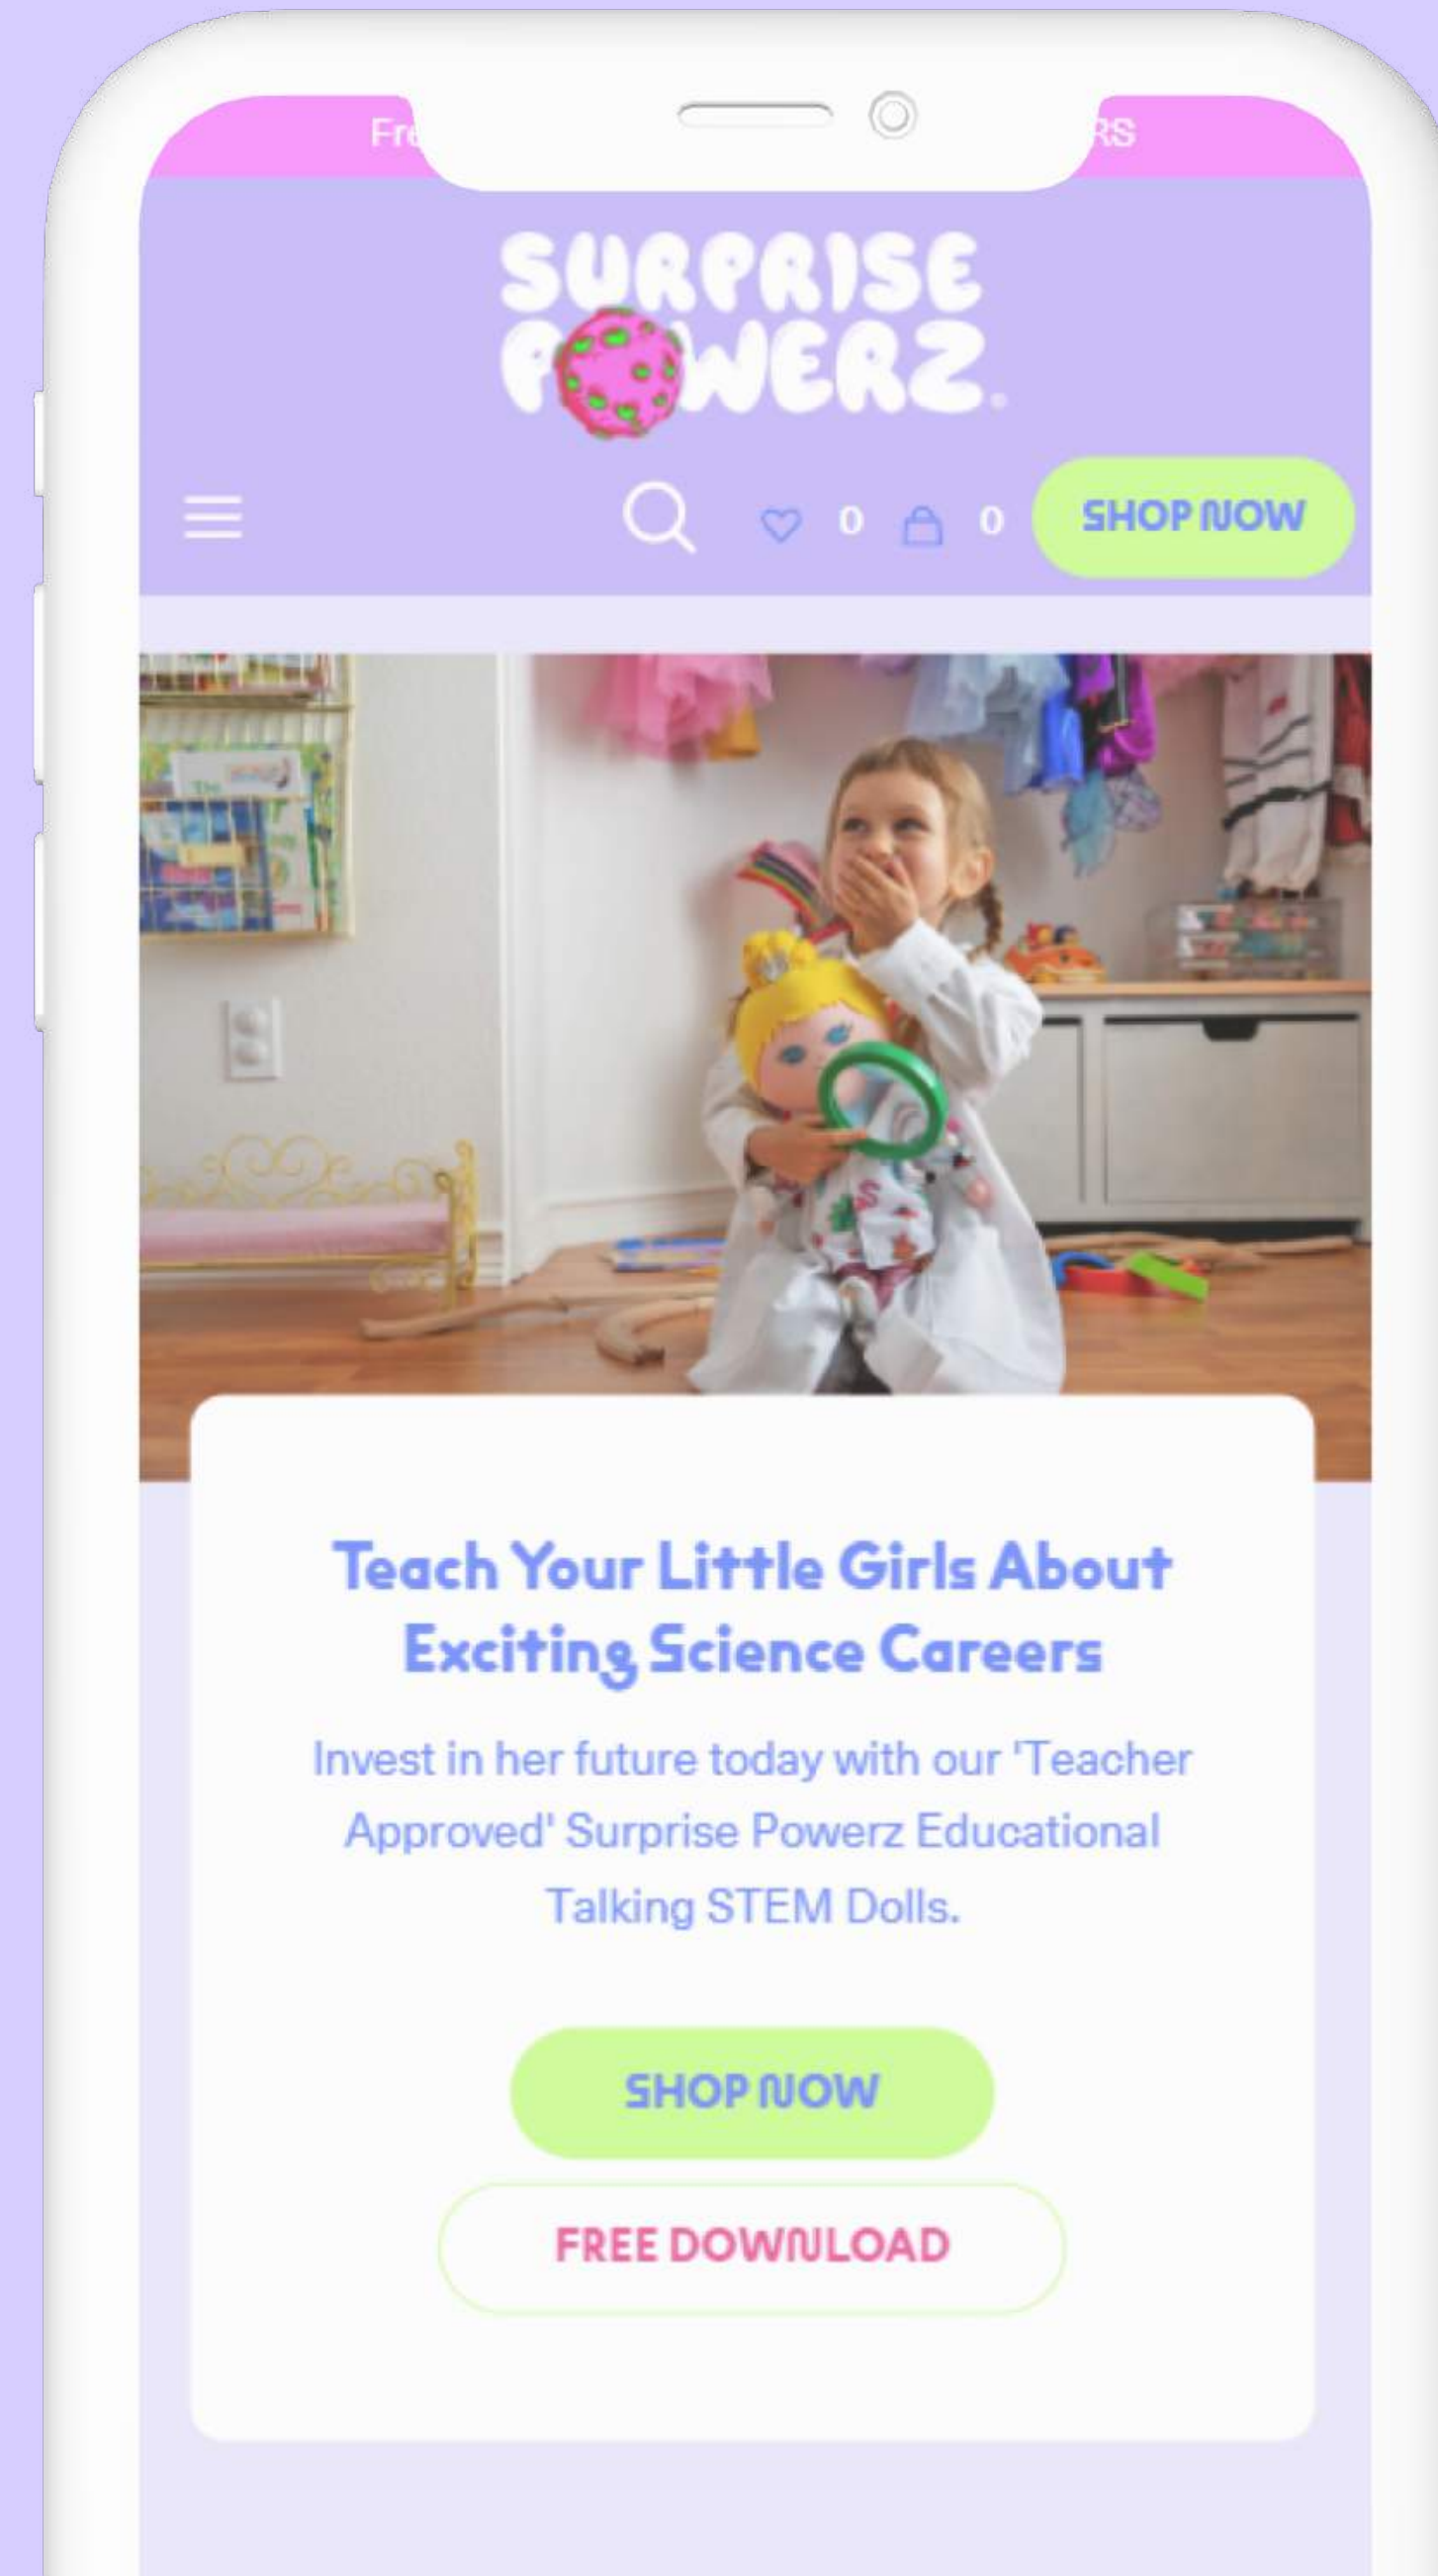

How to Get Started with Surprise Powerz
